- The storage capacity of your device

Explain what cyberbullying is in one or two sentences.

1 response

Cyberbullying is a situation where someone uses digital platforms, such as social media or a messenger, to bully, threaten, or harm another person. Cyberbullying may involve spreading rumors, posting hurtful messages, or posting embarrassing content.

What should you do before sharing personal information online?

1 response

Before sharing personal information online, you should check if the website or platform is secure and trustworthy. Review the privacy settings. Also, make sure that the information is truly necessary to share.
